

Salzburg CHOP Seminar

Medical Leadership

October 2017

This seminar is aimed at preparing physicians to assume leadership roles within their institutions. The course focuses on knowledge, skills and attitudes necessary to be an effective leader. Didactic sessions and workshops explore different leadership and communication styles, methods of planning and promoting change, leadership in meetings, and understanding leaders' roles in promoting value based health care in a changing health care environment. In place of a typical case presentation, each participant will be asked to present a mock meeting with their staff defining a problem and addressing the need and method for change.
