

TESTIMONIALS FROM FELLOWS

NEONATOLOGIST, SLOVAKIA

This educational program not only changed my life, it saved the lives of my newborn babies who otherwise would not have had a chance.

PEDIATRICIAN, SERBIA

Everything is completely different where I come from. My wish to learn, to become a better doctor and to change something, was never understood in my home-place, and in my country either. After the seminar, I came back to reality with a different perspective and a lot of motivation, that I haven't felt for a long period of time. The week in Salzburg showed me that there are still people who want to share their knowledge, their experience and good will, with people all around the world who don't have a chance to see or experience that much often.

ONCOLOGIST, MOLDOVA

I'd like to thank you again for the wonderful possibility to attend Salzburg Medical Seminars on Oncology A: Hematologic Malignancies, especially for the updated medical information and skills, new professional contacts and indelible breathtaking impressions about Austria.

GYNECOLOGIST, BULGARIA

I would like to thank you for the wonderful week I spent in Salzburg. I had an astonishing experience. I significantly improved my knowledge, I made new contacts and I met many new friends. All of that made me want to be part of this experience again in the future. But most of all, I have to express my respect for all of the faculty. Despite your sophisticated lectures, you behaved so friendly that in the end of the week I felt you were more like friends and all this made me respect you more and more. Thank you very much!

OPEN MEDICAL INSTITUTE 
Medical Education Beyond Borders

OMI SEMINARS 2018 – SPEAKERS AND TOPICS

ABOUT THE OMI SEMINARS

The Open Medical Institute (OMI) is a global educational initiative founded in 1993 by The American Austrian Foundation and physicians from Weill Cornell Medical College and co-funded by the Austrian Federal Government, the OSF and other private and public institutions, corporations and individuals. Our mission is to improve health care in countries in need, build local capacity and prevent brain drain. Therefore, we offer multiple fellowships for interested physicians and health care providers to participate in short-term educational programs (Seminars and Observerships), where fellows can share experience and expertise with leading experts from around the world. By establishing personal relationships, this program induces career long mentoring and fosters professional growth.

Leading US and European institutions, including Weill Cornell Medical college and affiliated hospitals (NewYork-Presbyterian Hospital, The Hospital for Special Surgery, Memorial Sloan-Kettering Cancer Center), The Children's Hospital of Philadelphia, Duke University Medical Center, Cleveland Clinic Foundation, The College of Physicians and Surgeons of Columbia University and the Medical Universities of Vienna, Graz, Innsbruck and Salzburg provide the academic leadership for the seminars held at Schloss Arenberg in Salzburg, Austria, with all faculty members serving pro bono.

Don't miss this unique opportunity to update your medical knowledge and exchange experiences with experts and colleagues from around the world.
